SUSTAINABILITY ASSESSMENT CONCENTRATION

[COURSE CODE]

Environmental Management and Assessment

Be the engineer who keeps projects compliant.

Build and audit an environmental management system, and scope an environmental impact assessment to Saudi national requirements.

WHAT YOU WILL STUDY

- Environmental management systems (EMS) and ISO 14001
- Environmental aspects, impacts and significance
- Saudi environmental law and compliance obligations
- Performance evaluation and EMS auditing
- Environmental impact assessment (EIA): screening, scoping and baseline studies
- Impact prediction, mitigation and monitoring plans

YOU WILL BE ABLE TO

1. Identify and rank the environmental aspects of an engineering activity
2. Plan and run a mock internal EMS audit
3. Prepare an EIA scoping report with mitigation measures

ABBREVIATIONS

ISO International Organization for Standardization

EMS Environmental management system

EIA Environmental impact assessment

NCEC National Center for Environmental Compliance

AUDIENCE

Civil and Environmental Engineering

Chemical Engineering

Petroleum Engineering

Industrial and Systems Engineering

Construction Engineering and Management

STANDARDS COVERED

ISO 14001
Environmental management systems

ISO 19011
Auditing management systems

NCEC requirements
Environmental impact assessment and permitting

PROFESSIONAL PATHWAY

Prepares you for ISO 14001 internal and lead auditor training.
