SUSTAINABILITY ASSESSMENT CONCENTRATION

ARE 460

Green and Sustainable Buildings

Design buildings that use less and earn a green rating.

Rate, design and improve buildings with the LEED and Mostadam rating systems.

WHAT YOU WILL STUDY

- Green building principles and rating systems
- LEED and Mostadam certification process
- Sustainable sites, location and transportation
- Water efficiency in arid climates
- Energy performance, renewables and commissioning
- Materials, embodied carbon and indoor environmental quality

YOU WILL BE ABLE TO

1. Evaluate a building against LEED and Mostadam credits
2. Propose integrated design improvements with cost in view
3. Use energy, water or daylight tools to support decisions

ABBREVIATIONS

LEED Leadership in Energy and Environmental Design

AUDIENCE

Architectural Engineering

Civil Engineering

Mechanical Engineering (building services)

Electrical Engineering (lighting, power)

Construction Engineering and Management

Architecture

STANDARDS COVERED

LEED
Green building rating system, United States Green Building Council

Mostadam
Saudi green building rating system

Saudi Building Code
Energy conservation and green construction provisions

PROFESSIONAL PATHWAY

Prepares you for the LEED Green Associate examination.
